## RECOMMENDATIONS / REFERENCES

---

### Dan DeMaria - Web Development Program Coordinator at BrainStation

**e-mail:** *ddemaria@brainstation.io*

"Angelique was a pleasure to work with in our full-time web development class. She is very driven and did a great job of helping her classmates stay motivated. She is quite a focused worker, and easy to work with when she encountered difficulties. She proved herself adept at front-end development with HTML, CSS and React / Javascript, as well as back-end tasks using Node, Express, HTTP requests, and database management. Angelique would be a very capable junior web developer, with the interpersonal skills needed to succeed in a wide range of other roles."

### Jonathan Bluks - Web Development Educator at Brainstation

**e-mail:** *jbluks@brainstation.io*

"Angelique was a passionate and engaged student at Brainstation. She was active and friendly in class, openly asking questions and seeking clarification, while also sharing her knowledge with other students. She is hardworking, and independent, but definitely not afraid to ask for clarifications and help. By the end of the class, I am confident that she has a strong skill-set for front-end web development, and a growing knowledge of back-end development."

### Will Crane - Web Development Teaching Assistant at BrainStation

**e-mail:** *wcrane@brainstation.io*

"Angelique is a wonderful, intelligent person who is always willing to go above and beyond. She constantly strives to increase her realm of knowledge, and is always willing to share that knowledge with others. As a student she was a pleasure to work with, and I cannot recommend her enough. Her knowledge in the realm of web development is strong, and her thirst to continue learning is even stronger."

### Thuy Doan - Junior Full-Stack Developer at Prodigy Game

**e-mail:** *clearlythuydoan@gmail.com*

"From April until June 2017, I was a Teaching Assistant for BrainStation's full-time web development immersive 10-week course. Angelique was one of my students. I have seen her grow from someone with basic web development skills to someone who can now build full-stack applications with an express server, React in the front, and a database. In terms of her personality, she is very persistent in the face of obstacles and it's that attitude that leads her to succeed. I fully believe she has the attitude to be a life-long learner and contributor to a development team."
